

Dear Students,

Welcome to the University of Miskolc. On behalf of the Faculty of Mechanical Engineering and Informatics, I would like to congratulate for gaining your admittance and express our sincere with the hope that your stay here will be a pleasant and rewarding period. We will do our best to provide you with a stimulating environment to attain the desired scientific knowledge and earn a valuable degree with great success. Now you have access to all sources available to your education, and the opportunity to participate at research projects.

In exchange, all students – with no regards to their nationality – must respect certain rules. These regulations for students of the University of Miskolc can be found at the following link:

About the Faculty of Mechanical Engineering and Informatics

The Faculty of Mechanical Engineering and Informatics of the University of Miskolc has come a long way since its foundation in 1949. Due to the challenges of the last seven decades or so, the Faculty has gone through internal development, the result of which is a modern engineering faculty of multidisciplinary nature. It involves, merges and integrates the disciplines of mechanical engineering, informatics and electrical engineering, both in its teaching and in its research, and is able to meet the current challenges of industrial modernisation as well.

The Faculty of Mechanical Engineering and Informatics has always given the best answers to the challenges of times. It mostly depends on us whether, by uniting the inner and outer forces that influence the future of the faculty, we can continue to navigate the ship of the largest faculty of the University of Miskolc in the right direction.

Dr. Zoltán SIMENFALVI, Dean
