

Want to join our engineering Team?

Become part of the aXpel group.

We have been successfully processing fibre-reinforced plastics into technical moldings (casings, housings, vehicle parts, insulators, etc.) for various branches of industry. Become a part of the aXpel group and grow with us.

We are in an exciting growth phase and are looking for you as of now
as a

Design Engineer

Let's work together

You will have the opportunity to work on some of the most significant and challenging projects in the composite plastic industry. To this end, YOU will lend a hand with the following tasks:

- Design and development of technical parts and mechanical components in the composite plastic industry
- Understanding and processing customer requirements according to engineering standards, taking into account quality, reliability, cost-effectiveness and other constraints
- Creation of 3D models and drawings, management and approval of bill of materials and other technical documentation using CAD and PLM/PDM programs
- Design and development of measuring instruments and jigs for production
- Carrying out tolerance calculations, examining manufacturability analyses, preparing presentations and other technical documentation
- Leading and support project teams
- Searching for possible errors occurring at the start of production and investigating their root causes, supporting post-design work, managing engineering changes
- Participation in reviews of quality control and development processes
- Carrying out other work in the development department and providing technical support to other internal groups or external customers

What makes you tick

Proactive, communicative, passionate, convincing and determined; these and the following qualities are part of your DNA:

- Education in a relevant field (mechanical engineering).
- At least **3 years** of experience in a specialized design field
- Experience in using a CAD program (advantage: **Creo**)
- Knowledge of engineering PLM/PDM system, corporate management system
- MS office skills
- Fluent English language skills (oral and written)

What we offer you

- A varied and responsible job in an exciting working environment
- A careful and comprehensive induction
- Digitised work tools
- A lot of personal responsibility and commitment

INTERESTED?

Then we look forward to receiving your complete and meaningful application documents at jobs@axpel.com
