b) Any other scientific/research achievement, patents, etc:

Research Activities:

- Image Processing System (IPS);
- Image Processing System and Neural Networks;
- Electro-Discharge Machining Processing (EDM);
- Integration of CAPP and CAPC in Discrete Manufacturing Systems;
- Optimization of Total Cost of Turning Processes using Design and Mathematical Analysis;
- Desing and Manufacturing of TI-135 Type Truck Exhaust and Intake Pipes Using CAD/CAM Systems;
- Simulation and Optimization of Non-Linear Motion of Four-Axis Scara Robot;
- Experimental Process of EDM (Electro-Discharge Machining) with different kinds of electrodes.

Projects Activities:

- Solving Some Optimization Problems of CAPP in CIM Environment (a Part of PhD-thesis);
- Notch Effect on The Reliability of Quasi-Static Loaded Structures (a Part of PhD-thesis);
- Analysing and Documenting of Simple and Complex Industrial Components Using Finite Element Method (Bay Zoltan Interior Project);
- Hungary-Turkey R&D Inter-governmental Project: Developing of CAQC Softwer for Elimination Turning Process Error;

Jedlik Ányos Predoctoral Scholarship 2013/2014, National Excellence Programme

Young Researcher Scholarship 2017/2018 – New National Excellence Programme

Developed a fuzzy automaton based behaviour simulation system in cooperation with ELTE and BME.

Developed and implemented a new concept for access control in the kernel of Linux operating system, which is successfully applied in production environment on high traffic servers with significant amount of users.

c) Other qualified skills/experiences/honors:

Organizing and preparing student teams for the Asia Student Supercomputer Challenge from 2014 to 2018 with success: among the TOP16 (ASC’14, ASC’15, ASC’16) and later the TOP20 (ASC’17, ASC’18) teams („First Class Award”).

Rector’s award, University of Miskolc, 2016

Cooperation in ethorobotics, with the Human-System Laboratory at Chuo University, Tokyo.

Peer reviews for international journals and conferences.
