

Distance Education Survey

27 responses

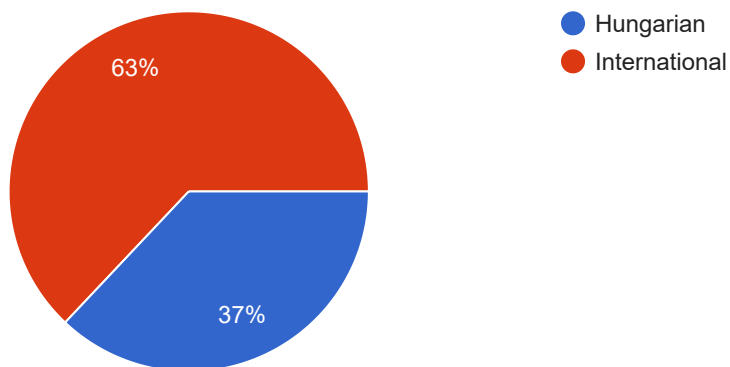

At what stage of your Ph.D. training are you?

27 responses

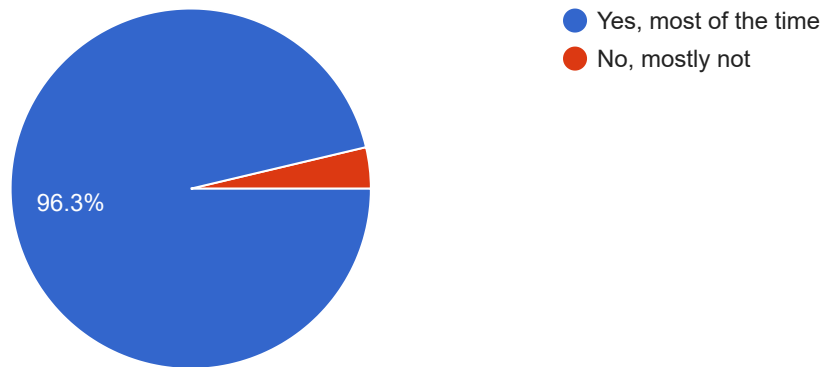

Are you a Hungarian or international student?

27 responses

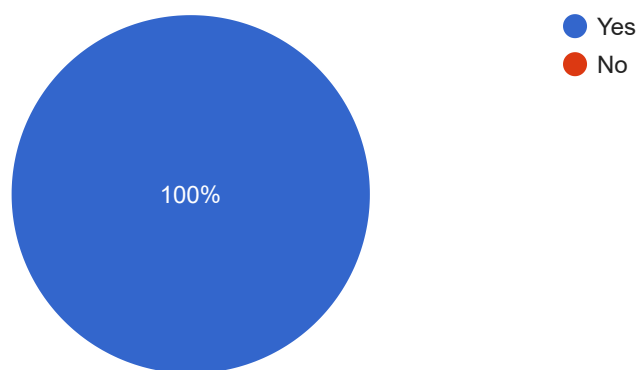

Have you always had a proper internet connection in the last semester?

27 responses

Do you have all the necessary equipment for distance learning (laptop, computer)?

27 responses

If you did not have all the necessary equipment for distance learning, please specify what else you needed

1 response

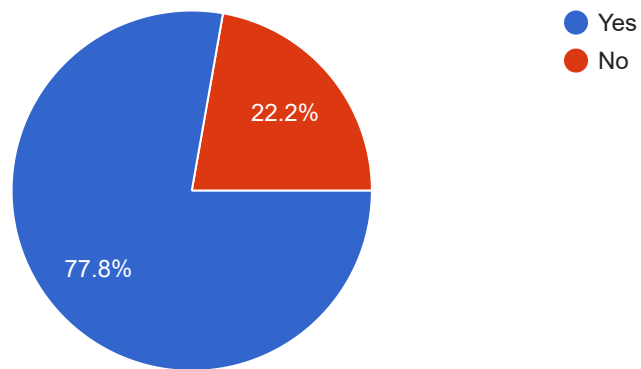

N/A

To complete the subjects taken in the training-research phase ...

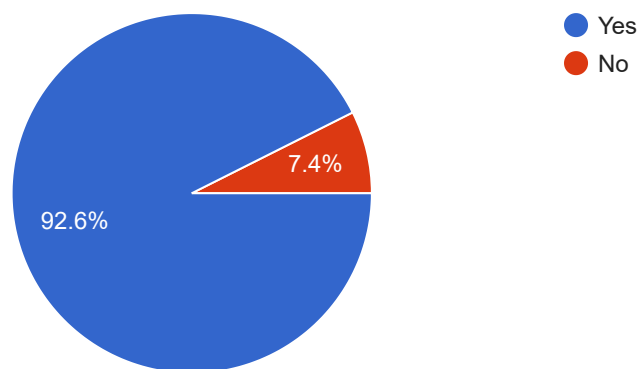

i. Were all the classes held online?

27 responses

ii. Could you properly consult the subject's lecturer online?

27 responses

If your answer is no for the previous question, please specify

3 responses

I have attended one subject a face to face

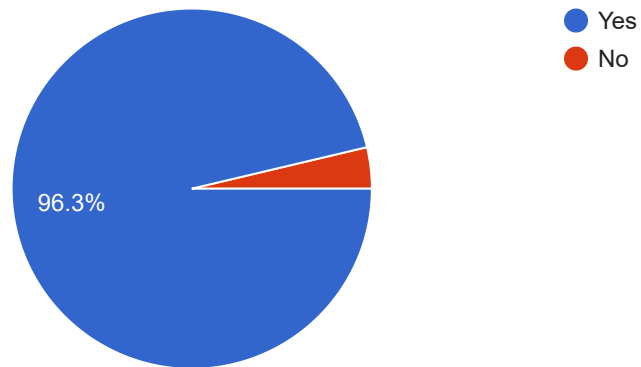

Most of my subjects i received reading sources without online classes

I have no subjects after complex examination, only as an educator.

iii. Could you keep in touch with the lecturer via email?

27 responses

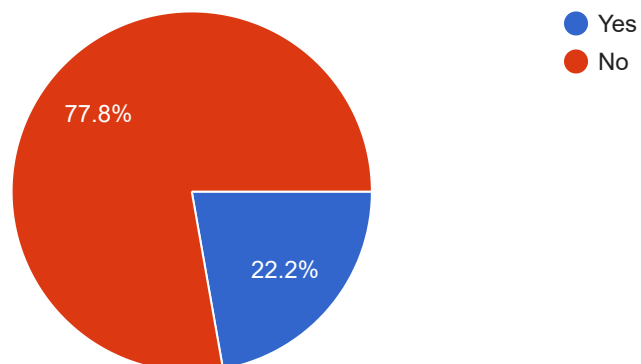

If your answer is no for the previous question, please specify

1 response

Similar

iv. Did the COVID situation affect your knowledge gained from the subject?

27 responses

If your answer is yes for the previous question, please specify

6 responses

Delay in research work (experimentation)

some time I need more information and clarifications

i had the time to study more

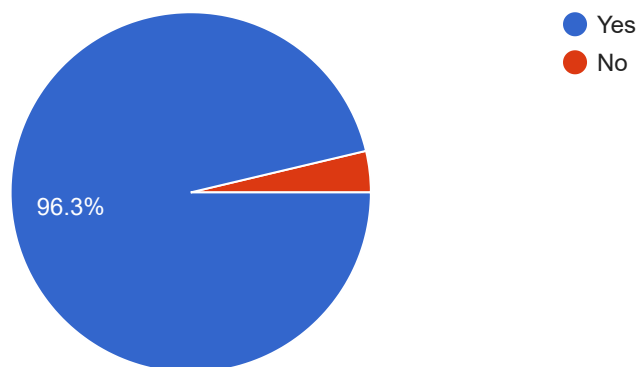

I am needing more practical work which is not supported by online training

In physical learning we had more discussion and the flow of information is better

I missed the lab. work that I should have been done

Were you able to consult your supervisor properly during the spring semester?

27 responses

If your answer is no for the previous question, please specify

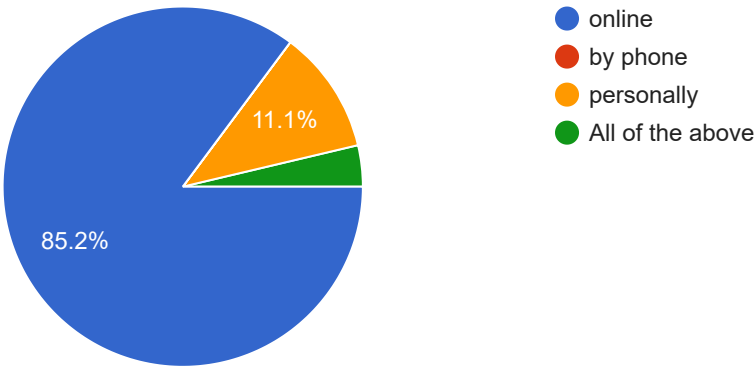

1 response

I could, but cannot choose yes due to some technical issue.

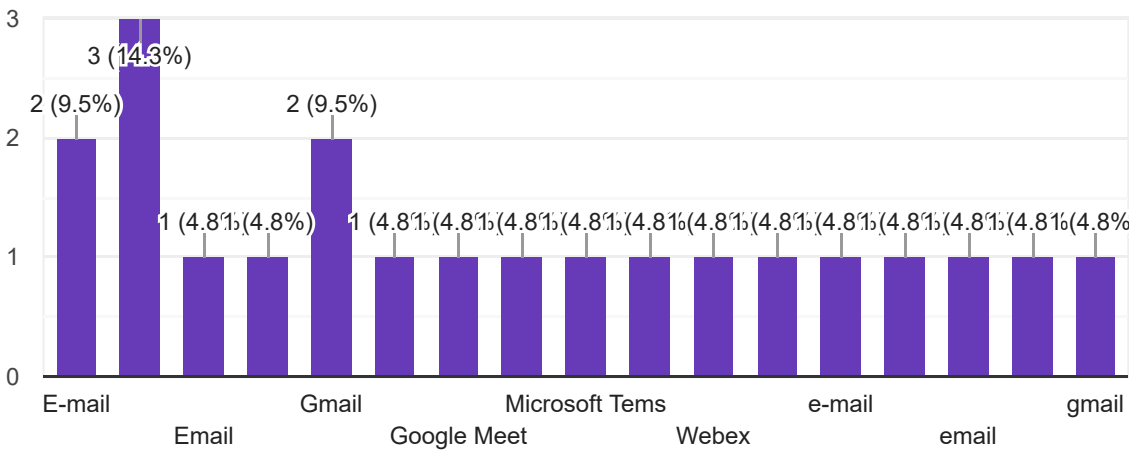

How did you keep in touch with your supervisor?

27 responses

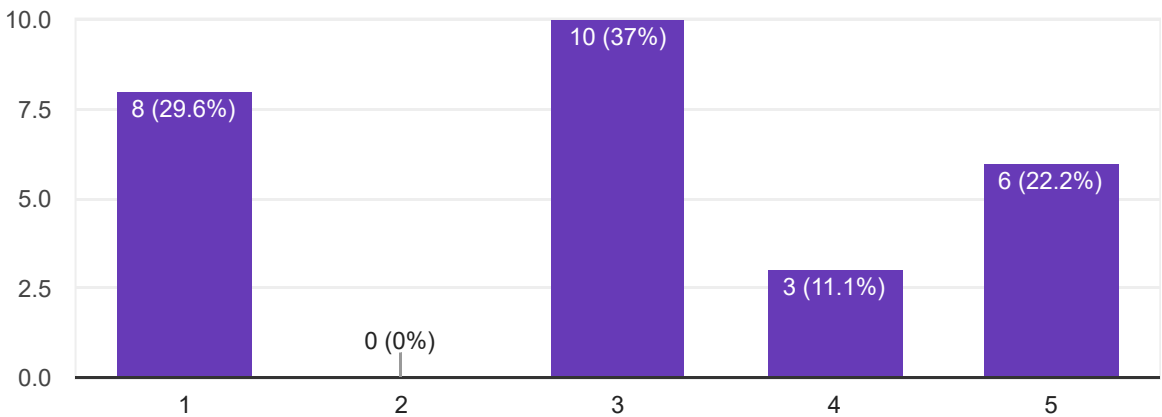

If you communicated online what platform was used?

21 responses

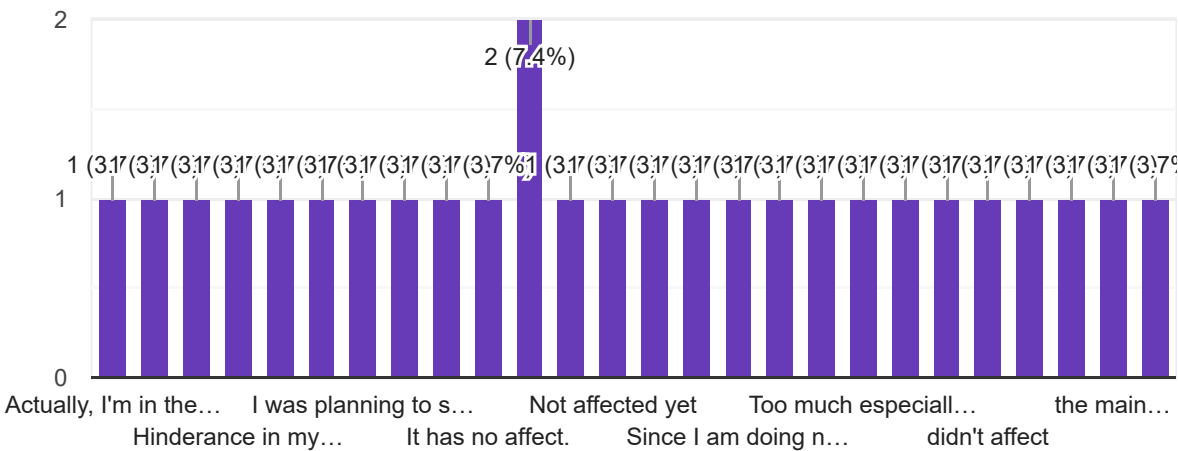

To what extent did the closure of the university hinder your experiments and laboratory work related to your research topic?

27 responses

How did COVID situation affect the progress of your research?

27 responses

What suggestion do you have in case the university will be closed similarly to students in the next semester due to the coronavirus situation? How could the Doctoral School help with its work?

14 responses

Experimental test should be allowed while considering all precautionary measures and rule laid by the authorities concerning to the Covid 19 pandemic situation.

provide protection equipment like mask and keep distance between students.

Although the last semester was fine for me, in my opinion a regular online meeting (e.g. using MS Teams) would be good to have (e.g. in every second week).

This is okay for PhD students in the research and thesis writing stage. The Ph.D school can assist in its work by overcoming all difficulties that hinder students' progress.

I think we can get the lectures online but laboratories of the university must be open for the students who have experiments work on their research topic.

Keep the students updated, organise online conferences

allow us to do the practical work
